PERSONAL ACCOUNT

Everything that matters, together

Access from the web account and Mini App

Balance
one ledger

Plans
shared history

Referrals
one network

01 **Login and password**

Sign in directly to your personal account.

02 **Confirm through the bot**

Sign in with help from @VimoTradebot.

If you previously created separate accounts, contact support about combining them after verifying access to both.

ONE PLAN · ONE SET OF TERMS

The details, clear from the start

VIMO PLAN

10%
accrued every 24 hours
on the plan amount

20
days
plan duration

10 USDT
minimum
opening amount

24 hours
interval between
accruals

Principal is included in accruals

The original amount is returned within the daily accruals. There is no separate principal repayment at the end.

Accruals go to your main balance

Every credit appears in your transaction history. A transfer to an external wallet requires a separate withdrawal request.

FROM OPENING TO COMPLETION

Every plan has its own timeline

The term begins when the plan opens.
Key dates are shown on the plan card.

01

Opening

Choose the amount and fund the plan. Its start time is recorded.

02

First 24 hours

The next accrual follows the plan’s opening time.

03

Each day

Accruals reach your main balance throughout the plan term.

04

Completion

The cycle ends on day 20. The original amount is already included in the accruals.

EXAMPLE BASED ON PLAN TERMS · 200% TOTAL

100 USDT × 10% × 20 days = 200 USDT

The 200 USDT total already includes the original 100 USDT.
Opening, completion and next-accrual dates
are shown in your device’s time zone.

TWO WAYS TO OPEN A PLAN

Fund your balance or pay directly

Choose the option that suits you now.
Select the asset and network in one form.

Your shared balance is the centre of activity in Vimo

A Fund your balance first

Choose an asset and network, then transfer to the address provided. Once confirmed, open a plan from your balance.

B Pay for a plan directly

Enter the amount, asset and network in the opening form. Then transfer using the payment details provided.

You do not need a withdrawal wallet address to open a plan.
Provide it when you create a withdrawal request.

TWO ASSETS · SIX ROUTES

Choose the asset and its network

Funding and withdrawal forms show the exact route:
for example, USDT on TRC20 or USDC on ERC20.

MAIN BALANCE UNIT

USDT

USDC transactions are recorded
on your balance at a 1:1 ratio.

1 USDC = 1 USDT in Vimo's ledger

ASSET	AVAILABLE NETWORKS
USDT	BEP20 · TRC20 · ERC20 · TON
USDC	ERC20 · BEP20

The network determines the payment address and withdrawal route.
Use the asset and network selected in the form when making a transfer.

EXTERNAL TRANSFERS START WITH YOU

You control each withdrawal request

> Daily accruals and referral rewards stay on your main balance until you choose what to do with them.

01 **Create a request**

Enter the amount, asset, network and your wallet address.

02 **The request joins the queue**

The queue is then processed automatically.

03 **Follow the status**

Track the transaction in your account history.

A credit to your balance and a wallet withdrawal are two separate entries in your transaction history.

FIVE LEVELS IN YOUR REFERRAL NETWORK

Share Vimo with your link

Level 1	Level 2	Level 3	Level 4	Level 5
10%	4%	3%	2%	1%

Rewards are calculated on each accrual from your referrals' plans and credited directly to your main available balance.

Plan example: 100 USDT → 10 USDT accrued per day. Daily rewards by level: 1 / 0.4 / 0.3 / 0.2 / 0.1 USDT.

EVERY ACTION HAS ITS PLACE

An account that is easy to navigate

Overview

Key account figures
and shortcuts to everyday actions.

Capital

Your main balance, funding
and withdrawal requests.

Plans

Active plans, their terms
and upcoming accruals.

Referrals

Your referral link, network
and referral rewards.

History

Transactions and request statuses
in a chronological record.

Profile

Account settings
and sign-in details.

Questions about account access or a transaction can be sent to support from the Vimo interface.
